*Reasons for Allowance*

1. The following is an examiner's statement of reasons for allowance: In response to the Applicants' APPEAL BRIEF, received 17 December 2009, the Office has made a thorough review of the material and arguments presented and has found it to be persuasive.
2. With regard to independent claims 1 and 12 claiming a method and an apparatus for non-linear processing of at least one set of luminance, saturation, and hue parameter values of input picture signals so as to produce output picture signals based on the hue parameter value and an **output luminance parameter value** and an output saturation parameter value, by using a matrix converter block, input luminance, saturation and hue parameter values of the input picture signals; obtaining the output saturation parameter value **by increasing the input saturation parameter value up to a maximum level** in a saturation processing block; and determining said maximum level using the input hue value and the **output luminance parameter value** in a saturation bound evaluation block such that clipping of a color driving value does not take place is unique and non-obvious over the art of record.
3. The Examiner has determined that the case is in condition for allowance and is withdrawing the currently existing rejections to claims 1-5 and 8-12 thus allowing the application to continue on to issue.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
